Years Contributing to Research in Chile:  
Looking Back & Moving Forward

# **XL Annual Meeting of the Chilean Biochemistry and Molecular Biology Society**

**September 26 to 29, 2017,  
Puerto Varas.**

# **FALLING IN LOVE WITH SCIENCE ... A WAY OF LIFE**

The Chilean Society for Biochemistry and Molecular Biology promotes theoretical and experimental research, leading to the advancement and dissemination of Biochemistry and Molecular Biology in Chile. The Society also encourages and promotes initiatives aimed at maximizing the use of science for the benefit of the country and its citizens. This dream was founded in 1974, when Dr Hermann Niemeyer, Dr Marco Perretta, Dr Lylian Clark, Dr Enrique Beytia, Dr Arnaldo Foradori and Dr Arturo Yudelevich signed the document that gave legal status to the Chilean Society for Biochemistry and Molecular Biology. Subsequently, the first Annual Meeting was held in 1977.

This year, our society celebrates the XL version of its Annual Meeting. Despite the passage of time, the quality, excellence and love for science remain the central axis of each and every one of our Meetings. Currently, the Society has more than 150 members, including researchers from Chilean and foreign universities. The enthusiasm and dedication to scientific activities of all our members constitute the body and soul of this Society. Our Annual Meeting aims to be an open door to the scientific community, at national and international levels, and a showcase for scientific excellence. We hope that the colleagues who entrusted us with the dissemination of their work at our meeting, can appreciate our firm commitment to high-quality research, with the solid aim of pursuing the advancement of biochemistry and molecular biology. As the Directive of the Society, we wish to transmit a strong signal that each member is important to us. The previous Directive began the process of legalizing the Society, a process that is culminating with the update of our statutes in the current Directive. It has been an honor for us to serve you and the Society in this exciting and historical process. We also believe in decentralization, for which we have been holding regional meetings in different cities throughout the country represented by a local Director, in addition to supporting several initiatives proposed by members.

We wish to conclude this editorial letter by thanking all the people and institutions who, by placing their trust in this Directive, together with you, have made it possible to transform the dream of the founding colleagues of our beloved Society into a reality. To all our partners and friends of the Society, we say "WELCOME" and we hope you enjoy this excellent

Annual Meeting that gathers prestigious national and international researchers. We also invite you to help us in the continuous growth of your Society, the Chilean Society for Biochemistry and Molecular Biology.
