

### Looking for postdoctoral fellowship applicants

The zebrafish development and disease models laboratory (ZDDM) at University of Liege in Belgium, is looking for highly motivated PhD or PhD students (near to obtained their degree) to apply for postdoctoral fellowship at Belgian regional funding (WBI) and/or Chilean funding (Becas Chile). The Postdoctoral research will be focused on pancreatic beta cell regeneration using zebrafish as model organism and combining genetic tools such as CRISPR-Cas9 and high-throughput techniques (RNAseq, ATaseq, among others).

Interested candidates, please contact Isabelle Manfroid (PhD)
